Experience

FPT SOFTWARE, Intern Frontend Developer

Ho Chi Minh City, Vietnam

Dec 2023 – Apr 2024

- Developed responsive UI features such as Email Management and Student Reservation modules using ReactJS, React Query, TypeScript, Tailwind CSS, and Ant Design.
- Collaborated with an 8-member Agile team to ensure seamless UI/UX design and smooth API integration throughout the platform.
- Participated in sprint planning, code reviews, and testing to deliver high-quality features on time.

Projects

EcoBites – Food Order App, Mobile Programming Project, Developer

[Github](#) | [View](#)

- Developed key features including food browsing, cart management, order history, and secure checkout with ZaloPay
- Implemented authentication with Firebase and biometric login, and integrated Google Maps for delivery location selection
- Collaborated with a 4-member team to deliver the project as part of the product.
- **Tools Used:** Java, Android Studio, Firebase, Glide, Material Design

Jobee – AI-powered CV Builder, University Startup Project, Frontend Developer

[Github](#) | [View](#)

- Implemented core features including CV Builder, Job Listings, and Employer Dashboard, enhancing platform usability for both job seekers and employers.
- Enhanced UI/UX and responsiveness across devices.
- Integrated APIs and collaborated with backend team for AI-powered features.
- **Tools Used:** ReactJS, TypeScript, Tailwind CSS, Ant Design

WorkHive – Coworking Space Booking Platform, Graduation Project, Frontend Developer (Web & Mobile)

[Github](#) | [View](#)

- Developed booking system for desks, offices, and meeting rooms, enabling real-time availability tracking and reducing scheduling conflicts.
- Implemented role-based access for Customers, Owners, Staff, and Admins.
- Integrated PayOS payment gateway, wallet system, and feedback modules, delivering a secure payment flow and improving user engagement.
- **Tools Used:** NextJS, React Native, Redux Toolkit, TypeScript, Tailwind CSS

WeatherHub – Modern Weather Application, Personal Project

[Github](#) | [View](#)

- Built a responsive weather app with real-time data and 5-day forecasts, supporting city search and geolocation.
- Implemented temperature unit toggle (°C/°F), persistent recent searches, and interactive forecast charts for enhanced UX.
- Integrated an AI-powered natural language assistant for weather queries, allowing users to ask questions conversationally.
- **Tools Used:** Next.js, React, TypeScript, Tailwind CSS, Framer Motion, Chart.js, AI integration (e.g., Gemini API).
